

Office of Joint Director Honey bee Research & Training Centre

The G. B. Pant University of Agriculture & Technology has established a significant milestone in the field of apiculture by developing a Honey Bee Research and Training Centre across an expansive 92-acre area within the university campus. This unique and large-scale center is designed to support advanced infrastructure for research, conservation, training, and extension activities in beekeeping.

The center houses a state-of-the-art honey processing plant with a capacity of 1,000 kg per day, along with essential accessories to support hygienic and efficient honey production. One of the key features is the establishment of a bee garden dedicated to the conservation and promotion of pollinators, which plays a vital role in enhancing agricultural productivity. The initiative aims to increase public awareness about pollinators and their significance, while also attracting interest from researchers, policymakers, and practitioners. This center stands as a model for scientific beekeeping, pollinator conservation, and rural empowerment, supporting Uttarakhand's leadership in sustainable apiculture.

This center is emerging as a reliable platform for beekeepers from Uttarakhand and beyond, offering scientific solutions and technological advancements to address their practical challenges.

Major Objectives of the centre

- **Promote sustainable growth of the beekeeping industry** for income generation, employment, and enhanced agricultural/horticultural productivity.
- **Develop infrastructure** for breeding high-quality bee stock, disease diagnostics, equipment manufacturing, and training facilities.
- Disseminate **state-of-the-art technologies and best practices** in beekeeping to increase productivity and diversify hive products.
- **Empower women** through inclusive beekeeping initiatives.
- Maximize economic, ecological, and social benefits by producing and marketing high-value bee products such as **honey, beeswax, bee pollen, royal jelly, propolis, comb honey, and bee venom** for both domestic and export markets.

Trainings: For the fulfilment of the objectives of centre, HBRTC, Pantnagar are organizing various level of trainings for students, beekeepers, individuals, NGOs, SHGs, Government Agencies, Govt/Private institutes.
