Weather Summary/Alert:

The upcoming five days show moderate to heavy rainfall between 25 to 60 mm in the district from 27.06.2023 to 01.07.2023. The maximum and minimum temperature would vary 19.0-21.0 degree celsius and 15.0-16.0 degree celsius. The wind speed would range from 4-6 kmph and wind direction would predominantly be east and east-north-east. Warning: An orange alert has been issued for 28.06.2023 where heavy to very heavy rainfall is likely to occur at isolated places in Nainital. Thunderstorms accompanied by lightning with intense/very intense spell is likely to occur at isolated places in hills of Uttarakhand. A yellow alert with similar conditions has been issued for 27, 29 & 30 June and 1 July.

General Advisory:

According to the extended range forecast from 23/06/2023 to 06/07/2023 shows normal rainfall in Uttarakhand district with the deviation from normal ranging between -2 to -16%. The mixed NDVI composite map obtained from the India Meteorological Department indicated that the NDVI ranged between 0.2-0.35 that symbolizes moderate agricultural power in the district. As the rainy season is arriving farmers are advised to download "Meghdoot App" to get last week's weather, weather forecast and agrometeorological advice and "Damini App" to get power information. Meghdoot and Damini apps can be downloaded from Google Play Store (Android users) and App Center (iOS users). This will help them in taking right decisions for the suitable farming activities.

SMS Advisory:

Heavy to very heavy rainfall is likely to occur at isolated places in Nainital on 28 June. Similar conditions are likely to occur on 27, 29 & 30 June and 1 July.

Crop Specific Advisory:

Crop(Varieties)	Crop Specific Advisory
RICE	Application of fertilizers should be done as 1/4 N and full P and K at the time of sowing. If cowdung is being used then apply it 15-20 days earlier and use 1/2 N (10-15 kg). In the valley, transplanting of paddy should be completed by the first week of the month.

Crop(Varieties)	Crop Specific Advisory
	Arrangement for irrigation and proper drainage of water should be done in the field before transplanting of paddy.
KIDNEY BEANS/ RAJMA	Rajma sowing should be done in the second fortnight of the month.
GREEN GRAM	Second fortnight of June is the suitable time for sowing of moong. For seed treatment, treat the bio-controller Trichoderma powder at the rate of 5 grams per kg of seed.
BLACK GRAM	Second fortnight of June is the suitable time for sowing of Urad. For seed treatment, treat the bio-controller Trichoderma powder at the rate of 5 grams per kg of seed.

Horticulture Specific Advisory:

Horticulture(Varieties)	Horticulture Specific Advisory
POTATO	The potato crop should be sprayed with a solution of mancozeb or copper oxychloride for the disease of the late blight. Farmer brothers, spraying should be done keeping the weather forecast in mind.
FRENCH BEAN	Harvest the ripened crop and to control Anthracnose which may occur due to rainfall can be avoided by spraying Carbendazim 50% W.P. @ 1 g/l. Farmer brothers, spraying should be done keeping the weather forecast in mind
TOMATO	Farmers should harvest the ripened tomato crop. There are chances of occurrence of disease after rainfall so destroy infected plants (when shriveled pitted leaves are visible) to control viral diseases and spray allpurpose insecticides to control sapsucking insects. Spray Mancozeb 2.5g/l or Copper oxychloride 3.0g/l of water to prevent outbreak of blight. Farmer brothers, spraying should be done keeping the weather forecast in mind.

Live Stock Specific Advisory:

Live Stock(Varieties)	Live Stock Specific Advisory
