

Title: Documentation of selected Indian textile museums, development of finishes for textiles conservation and designing of display showcases

Objectives:

- To develop anti-microbial finish using plant extract
- To develop show case designs for conservation of artifacts in the museums
- To disseminate process for preservation of artifacts and their display techniques in different museums

Technology Developed:

- Developed economical and safe antimicrobial finish extracted from plant source (*falconeria insignis* leaves) to be used for preservation of artifacts in the textile museums.
- Prepared sixty designs of showcase for conservation and showcasing the artifacts in the textile museums.

Free standing showcase

Dummy style display
