

**Ms Reena Garbyal- M.Sc., 2011**

**Title:** Computer aided designing and development of woven union fabrics from Angora / Merino and cre silu and evaluation of their properties

**Objective:**

1. To procure and evaluate the physical properties of angora-merino yarn and eri silk yarn.
2. To create woven designs by using customized weaving software and their visual assessment.
3. To prepare pure and union fabrics from eri and angora/merino yarns and assessment of their properties.
4. To establish end uses of prepared union fabrics.

**Technology Developed:**

- Development of union fabrics from angora/ merino and eri silk from arha weave software.

**Articles prepared from different designed union fabrics**

**Skirt and top designed with eri× angora/merino**
