About the Workshop

Millets, an important nutri-cereal crops of Himalayan region, are rich in nutrition and can address malnutrition for food and nutritional security. As it is known, that year 2023 is being celebrated as International Year of Millets in India and global level and therefore to commemorate “International Year of Millets”, and “National Nutrition Month 2023”, Department of Food Science and Nutrition, College of Community Science (Home Science) jointly with Directorate of Extension Education has planned to organize this 2-days workshop. The participants of workshop will include KVK Scientists of 9 Krishi Vigyan Kendras and 2-3 progressive farmers from each district of Uttarakhand associated with millet production, value addition and commercialization, few NGOs and SHGs of the state.

Organizers

- **Department of Food Science & Nutrition,
College of Community Science (Home Science), G.B.P.U.A.T, Pantnagar**

Department of Food Science & Nutrition, College of Home Science aims to provide knowledge and skills for being active partners in healthful development of the community; forge interactive relationship with the food/health industry; develop food processing technologies for value-addition with focus on domestic/global market; facilitate employment opportunities for economic empowerment of women and youth.

- **Directorate of Extension Education, G.B.P.U.A.T, Pantnagar**

The Directorate of Extension Education is actively involved in transfer of latest technologies emerging out of research laboratories to the farmers’ fields and getting feedback for further fruitful linkages. It performs various extension activities through training and visit unit, SAMETI- Uttarakhand, ATIC at headquarter and extension wings of different colleges along with 09 KVKs working in districts Almora, Chamoli, Champawat, Dehradun, Haridwar, Nainital, Pithoragarh, Rudraprayag and U.S. Nagar.
